

Municipality of Nafpaktia

Letter of Support for the Horizon Europe proposal “PeerMentor”

To whom it may concern,

On behalf of Municipality of Nafpaktia, I am pleased to express our support for the Horizon Europe proposal PeerMentor.

Municipality of Nafpaktia is active in local education-related initiatives, youth support, community services, and public-health-related activities in Nafpaktos. In this context, we consider the objectives of PeerMentor to be timely and relevant, particularly its focus on supporting healthier behaviours and sustainable prevention pathways among young people through a human-centred peer-mentoring approach.

If the project is funded, Municipality of Nafpaktia would be willing, where appropriate and within its remit, to support PeerMentor through one or more of the following:

- providing strategic feedback on project activities and outputs;
- contributing to stakeholder consultation, validation, or co-creation activities;
- supporting dissemination of relevant project results to appropriate audiences and networks;
- exploring participation in the project’s External Advisory Board;
- facilitating dialogue with practitioners, communities, institutions, or policymakers relevant to the project;
- facilitating access, where appropriate and in line with applicable procedures, to relevant educational settings, school communities, or networks for outreach, engagement, piloting, validation, or participant recruitment activities;
- considering the future uptake, adoption, or promotion of selected project outputs, where relevant.

This letter does not imply any financial commitment or legal obligation. It reflects our interest in the aims of the proposed project and our willingness in principle to engage with its activities and results, should the proposal be successful.

We believe that PeerMentor has the potential to generate valuable evidence, practical tools, and implementation guidance for healthier and more supportive youth environments across Europe.

Sincerely,

Vasilios Gizas
